7. (Currently Amended) An adapter card system including means for selecting between two different voltages for use by ~~the~~ an adapter card as a main power supply voltage, ~~the adapter card further comprising:~~
 - a bus;
 - a first card, including a power selector logic, connected to the bus; and
 - a second card, including a power selector logic, connected to the bus;
 - the power selector logic including:
 - means responsive to application of a first voltage at a first input of ~~the adapter card~~ for using the first voltage as the main power supply and preventing a second voltage applied at a second input of ~~the adapter card~~

from being used as the main power supply, where the second input is a default input; and

means responsive to a first voltage not being applied to the first input of the adapter card for using the second voltage applied to the second input as the main power.

8. (Currently Amended) The adapter card system of claim 7 wherein the adapter card is a PCI adapter.
9. (Currently Amended) The adapter card system of claim 7 wherein the first voltage is less than the second voltage.
10. (Currently Amended) The adapter card system of claim 7 wherein the first voltage is +3.3 volts and the second voltage is +5 volts.
11. (Currently Amended) The adapter card system of claim 7 wherein the first voltage is +5 volts and the second voltage is +3.3 volts.
12. (Currently Amended) The adapter card system of claim 7 further comprising means for regulating the second voltage.
13. (Currently Amended) The adapter card system of claim 7 wherein the means responsive to the first voltage being present at the first input comprises at least one transistor.

14. (Currently Amended) The adapter card system of claim 7 wherein the means responsive to the voltage not being present at the first input comprises at least one transistor.
